Press Release

Galindo Publicidad and New Energy Horizons Regional Center, sign agreement to promote Solar Energy Investments through the EB-5 US visa program

Hollywood, FL, November 16, 2011:

After 18 years in business in the United States, Galindo Publicidad is diversifying its activity and promoting a fast track type of immigration program, barely known, that creates jobs and brings foreign capital to the United States. As an authorized agent of New Energy Horizons, Galindo would be able to serve as the initial liaison in the process of providing an immigration path and attract foreign investment to this Designated Regional Center – New Energy Horizons Regional Center - approved to operate in the state of California in 2011. According to attorney Mr. Larry Behar, Legal Counsel for New Energy Horizons, “of the 10,000 investor visas that are available annually, a minimum of 3,000 are reserved for those who apply under the Regional Center program”.

A customized match of the Regional Center goals is made depending on the preferences, interests and needs of the foreign investors, from anywhere in the world. The threshold required investment level is US \$1,000,000.00, unless the investment is made into a business located in a targeted employment area, at which time a reduced investment of \$500,000.00 USD is required.

The New Energy Horizons Regional Center offers the opportunity to invest individually. As an individual, the investor receives an annualized interest of 4% . All EB-5 deposits are FDIC insured before investing; and investments in solar energy projects are also insured. The \$1,000,000 USD investment produces an annualized interest of 6%.

EB-5 is administered by the US government (USCIS) and it is dedicated to providing investors with one of the fastest and best US immigrant visa options available today. Qualified and approved investors and their families would enjoy permanent residency status and a path to US citizenship. All of this with the support of an active EB-5 team who are exclusively dedicated to the creation and administration of EB-5 Regional Centers and Investors. Investors can contact us to learn more and start a path to the future. This choice is one of the fastest options to US immigration along with an established set of opportunities for an international expansion of business development strategies and portfolios.

We are proud to promote Solar energy projects through the EB-5 choice. *“It creates jobs and attracts foreign capital. We need it now. Our companies share expectations and standards regarding our level of service, and I am pleased and excited to announce our affiliation.”* said Martha E. Galindo. President of Galindo Publicidad.

For Release 9 a.m. EDT, November 16, 2011
